Hi!

We are [LOCATION REDACTED] and we are doing a survey on neurodiverse people in software workplaces, with a particular focus on ADHD. We are primarily interested in ADHD work challenges, strengths, disclosure, accommodations, perceptions of software workers with ADHD, and strategies people use at work to get around difficulties they have.

You do not have to have ADHD to fill out the survey, as we are interested in seeing how other neurodivergent and neurotypical people can be supported in software workplaces, and seeing how people perceive software workers with ADHD overall!

This survey will take around 15-20 minutes to complete. Participation is voluntary and there is no cost to participants. If you are interested in participating, you must be age 18 or older and work or have worked at a job that heavily required developing software. Participants will have the option of completing a form afterward to enter a drawing for the chance to receive one of two Mastercard or Visa gift cards. The value of this gift card will be \$120, if the person drawn is located in the US. If the person drawn is located outside of the US, the gift card amount will be in the standard currency of the person's country of origin and will be of equal value to the US gift card amount according to the country's minimum hourly wage, and capped due to local laws.

The link to the survey can be found here: [LINK REDACTED]

If you have any questions about this survey or would like to know more about the research project, please contact [EMAIL REDACTED].

All the best,
[NAME REDACTED]
